DAVID Z. WALKER, Market Administrator

September 2001

## THE DAIRY SITUATION AND OUTLOOK

**Milk Production Down, Dairy Product Demand Strong** — Wholesale prices of dairy products have not exactly been steady but have not changed much since spring. Milk production has recovered only slightly and remains well below a year earlier. Meanwhile, dairy product demand has held strong despite mixed economic trends. Dairy prices may slip slowly during autumn 2001, but conditions are not projected to change quickly. In fact, market tightness probably could send prices upward in response to only slightly different outcomes.

Milk cow numbers have been about flat during recent months, at a level about 1 percent below the rising cow numbers of a year earlier. This year's much higher returns apparently have already slowed dairy farm exits. However, the very tight supplies of replacement heifers continue to inhibit expansion by stronger farms and caused farms to adopt the short-run expedient of keeping last-lactation cows an extra month or two. In addition, tight western hay supplies and high prices may also be affecting expansion plans. Milk per cow continues to suffer in the face of very favorable milk-feed price ratios. Forage quality remains a major factor. Widespread summer heat has had a significant effect, coming on the heels of damage from last winter's weather. Milk per cow has recovered a little from March-April but stays far below the trend line. Significant growth from a year earlier is not expected until autumn. Milk production is expected to move above a year earlier this autumn but large increases are not projected until 2002. Average cow numbers and milk production are expected to decline about 1 percent in 2001. Milk output could surge almost 3 percent in 2002 if milk per cow resumes trend growth as expected.

By the end of July, the high U.S. butter prices had attracted the equivalent of 24 million pounds of butter imported beyond the tariff-rate quota (TRQ). The high tariff imports consisted of almost twice as much butter as butteroil. The somewhat tight international butter markets, the seasonal lack of Southern Hemisphere production, the difficulty of marketing imported butter, and the inherent riskiness of over-TRQ imports limited such imports despite the nominal profitability. Over-TRQ imports are not expected to be significant this autumn. Since the reduction in the support purchase price of nonfat dry milk, U.S. powder has been available for commercial export at some very attractive prices. The European Union (EU) set their export restitution at zero, reflecting their tight domestic situation and international market strength. Even so, buyers have been very unaggressive. The large U.S. supplies are ample for importers' needs, and further weakening in U.S. prices is possible. In addition, seasonal tightening is still a few months away. Significant exports reportedly have been made, but large shipments probably will not start until autumn.

Seasonal easing in cream availability will start soon, as farm milkfat production increases, cream available from fluid products jumps, and

ice cream sales decline. Whether this easing translates into lower butter prices hinges on the state of current stocks, particularly pipeline stocks, and expectations of autumn market conditions. Late August price increases imply that users probably are not comfortable with supplies. Even so, prices may peak relatively early if milk production recovers as expected. However, milkfat markets probably will stay fairly tight until yearend and may remain volatile. Cheese prices may be softened by rising milk output and any slippage in butter prices. Like butter prices, cheese prices are not expected to decline substantially until at least yearend. Cheese prices will also be affected by where nonfat dry milk prices settle. Recent prices for powder have included sales at prices well above the current support purchase price of 90 cents per pound even though sales to the Government have been sizable. If additional commercial exports materialize, price support purchases may cease seasonally, but average prices may slip from current levels. Farm milk prices will be strong during the rest of the year, and the 2001 annual average will jump about \$3 per cwt to near-record levels. The expected surge in milk production next year probably will wipe out more than half of this year's price increase. Even so, farm milk prices are projected to stay well above those of 2000.

Miller, (202) 694-5184. Also, please note that this summary has been condensed from the original by the Market Information Branch, Dairy Programs AMS.

### PRODUCER TEST RESULTS AVAILABLE VIA E-MAIL

Producers tested by the Market Administrator's Laboratory can now obtain current test results by e-mail (24 hours 7 days a week). The e-mail address is: [usdaivr@fmmaclev.com](mailto:usdaivr@fmmaclev.com). The producer's passcode must be entered on the subject line. The latest available test results will be sent back in approximately one minute. Tests are updated at the end of each workday at 5:00 pm.

The producer passcode is available only on the multicolored postcard sent out monthly to each producer. It is located on the right side of the card, below the month and year. The subject line must contain only the six digits in the passcode, nothing else, in order to retrieve the tests. Please verify that the number is entered correctly before sending the e-mail. Names or other identifying information will not be available via e-mail, to ensure privacy. The sender's e-mail program must be properly configured and have the proper e-mail address listed as "From" in order to receive the test results back.

The Market Administrator's Lab may be contacted directly at [lab@fmmaclev.com](mailto:lab@fmmaclev.com) or by calling (440) 826-3220.

 Permit No. 2511

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at (202)720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Jamie L. Whitten Building, 14th and Independence Avenue SW. Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an Equal Opportunity provider and employer.
