November 1, 2016

To: Independent Producers, Mideast Marketing Area, Federal Order 33

From: Sharon R. Uther, Market Administrator *Sharon R. Uther*

The Mideast Market Administrator's office is introducing a secure, web-based producer test retrieval system. A producer who is not a member of a cooperative association can now access test information by logging on to the Mideast Market Administrator Laboratory website. Producers will still be able to receive test information via the interactive voice recognition (IVR) system, or by the updated email system. The latest tests are posted daily at 5 p.m., M-F. Producers will continue to receive postcards with monthly test averages.

To use the new web-based system, go to the Mideast Market Administrator Laboratory website at <https://lab.fmmaclev.com/>. You will be prompted to enter your 8-digit producer number and a 6-digit personal identification number (PIN). The producer number and PIN are the same used to access the IVR system found on the bottom of the monthly postcard. Once you are logged on to the website, tests may be retrieved by selecting a date range. The default date range is the current month's tests.

To retrieve tests via email, please direct your emails to testresults@fmmaclev.com with your PIN on the subject line (same as the current method).

Questions or comments regarding the web-based test retrieval system should be directed to Brooke Pepin at (888) 751-3220 Ext. 117 or bpepin@fmmaclev.com. There is also an option for leaving feedback on the website. Your feedback is appreciated.
